

# PPMI Expansion Introduction

- Data from the 2010-2020 and the current (2020+) Clinical EDCs have been harmonized
- These harmonized datasets are currently available to approved PPMI investigators
- An archival copy of the 2010—2020 datasets have been moved to an **Archived PPMI Data** section

# 2010-2020 Data

- All 2010-2020 datasets were moved from their current locations and into a new section called 'Archived PPMI Data'
  - Static
  - Deprecated

The screenshot displays the Parkinson's Progression Markers Initiative (PPMI) website. The header features the PPMI logo and the text "Parkinson's Progression Markers Initiative". Below the header is a navigation bar with links: HOME, PPMI @LONI, DOWNLOAD, and SEARCH.

## Download Study Data

**Select Items**

☐ ALL

- ☐ Adverse Events - Archived
- ☐ AV-133 Image Metadata - Archived
- ☐ AV-133 Imaging - Archived
- ☐ AV-133 Striatal Binding Ratio Results - Archived
- ☐ AV-133 Subject Eligibility - Archived
- ☐ Benton Judgment of Line Orientation - Archived
- ☐ Blood Chemistry & Hematology - Archived
- ☐ Brain and Bank Tissue Donation Plan - Archived
- ☐ Change of Category Form - Archived
- ☐ Clinical Cognitive Categorization - Archived
- ☐ Clinical Diagnosis Management Form - Archived
- ☐ Clinical Labs - Archived
- ☐ Clock Drawing - Archived

# 2020+ Data

- The harmonized datasets inclusive of all data 2010 to current resides in the appropriate sections
  - Updated nightly/weekly
  - Aligned with harmonized data dictionary

The screenshot displays the 'Progression Markers Initiative' website. At the top, there is a logo consisting of three concentric circles with a stylized 'P' inside. To the right of the logo, the text 'Progression Markers Initiative' is displayed. Below the logo and text, there is a navigation bar with the following links: HOME, PPMI @LONI, DOWNLOAD, SEARCH, and ARCHIVE. The main heading is 'Download Study Data'. On the left side, there is a sidebar with a list of categories: START HERE, Study Docs, Subject Characteristics, Biospecimen, Curated Data Cuts, Digital Sensor, Enrollment, Imaging, Incidents & Notifications, Internal, Medical History, Motor Assessments, Motor / MDS-UPDRS (highlighted), Non-motor Assessments, Remote Data Collection, and ALL. On the right side, there is a search bar with the placeholder text 'Search all data' and a 'Search' button. Below the search bar, there is a section titled 'Motor Assessments: Motor / MDS-UPDRS'. Under this section, there is a 'Filter(s)' section with a checkbox for 'Only include data that is new/changed since:' followed by a date input field. Below the filter section, there is a 'Select Items' section with a checkbox for 'ALL' and a list of items with checkboxes: Deep Brain Stimulation, Gait Data & Arm swing, Gait Data & Arm Swing Methods, Lower Extremity Function (Mobility), MDS UPDRS Part I, MDS UPDRS Part I: Patient Questionnaire, MDS UPDRS Part II: Patient Questionnaire, MDS UPDRS Part III, MDS UPDRS Part IV, MDS-UPDRS Tagging Status, and Modified Schwab & England ADL.

# Important Changes - Cohorts

- **Genetic Cohort Unaffected** participants have been transitioned to the **Prodromal** cohort
- **Genetic Cohort PD** participants have been transitioned into the **PD** cohort
- Records from **Genetic Registry Unaffected** and **Genetic Registry PD** cohorts are not part of the harmonized datasets

# Important Changes - Variables and Codes

- Some variables from the 2010-2020 data have been renamed to be consistent with the new clinical EDC
- Some coded values from the 2010-2020 data have been mapped into new codes to be consistent with the new clinical EDC
- An annotated data dictionary and an annotated code book are available containing:
  - Previous variable name
  - Previous code
  - Mapping notes
- The annotated data dictionary and codebook should be consulted when transitioning existing analysis processes from old to current data

# Quick Start

- If your processes relied on the APPRDX variable from the Screening dataset for identifying cohort, please use the COHORT variable in the Patient Status dataset instead
  - NOTE: COHORT coded values are consistent with previous APPRDX values
- The COHORT value represents the enrollment cohort for each participant and is the basis for the SOA
